RTS® SHOWS KP-32CLD COLOR DISPLAY KEYPANEL AT NAB 2008

April 2007

Las Vegas, Nevada, (April 14TH, 2008): RTS® is proud to introduce the KP-32CLD Color Display Keypanel at NAB 2008, Booth #C-5928.

With the introduction of the KP-32CLD, RTS® brings to market the flagship product of a new RTS keypanel. This innovative solution addresses both the primary needs and advanced features required by different customers for finer control of keypanel functions. The KP-32CLD uses a 4.9-inch, full-color LCD display to provide feature-rich operating functions. The KP-32 CLD also boasts an ergonomic design with a flat front panel that fits flush within a rack-mount configuration.

Features

Full Color Display

The new color display allows for a rich, modern, and user-friendly interface.

Modern, Modular Design

Flat front panel is ergonomically designed to fit easily into any control room or truck application.

Multi-Directional Keys

32 multi-directional keys used for talk, listen, and emulation of traditional LCP control function.

Future Expansion

Designed to allow for an expansion panel, program assign panel, and optional connections to the matrix. Supports today's and future transmission formats.

Enhanced Features

KP-32CLD allows up to six auxiliary inputs, independent digital gain control for microphone sources and configurable audio routing. The keypad has its integrated level control per key, which allow the user to adjust the listen volume on an individual basis.

DSP Processing

Acoustic Echo Cancellation, Equalization, Mixing, Filtering, and Metering

USB

USB connector for future expansion and other planned interface features already integrated.

###

Bosch Communications Systems—a business unit of Bosch Security Systems—is one of the world's leading manufacturers and suppliers of professional audio, wireless, life safety and communication equipment. Bosch Communications Systems offers complete system solutions for the world's most critical, high-profile installations and events.

###

The Bosch Group is a leading global supplier of technology and services. In the areas of automotive and industrial technology, consumer goods, and building technology, some 260,000 associates generated sales of 43.7 billion euros in fiscal 2006. The Bosch Group

comprises Robert Bosch GmbH and its roughly 300 subsidiary and regional companies in over 50 countries. This worldwide development, manufacturing, and sales network is the foundation for further growth. Bosch spends more than three billion euros each year for research and development, and in 2006 applied for over 3,000 patents worldwide. The company was set up in Stuttgart in 1886 by Robert Bosch (1861-1942) as "Workshop for Precision Mechanics and Electrical Engineering."

The special ownership structure of Robert Bosch GmbH guarantees the entrepreneurial freedom of the Bosch Group, making it possible for the company to plan over the long term and to undertake significant up-front investments in the safeguarding of its future. Ninety-two percent of the share capital of Robert Bosch GmbH is held by Robert Bosch Stiftung GmbH, a charitable foundation. The majority of voting rights are held by Robert Bosch Industrietreuhand KG, an industrial trust. The entrepreneurial ownership functions are carried out by the trust. The remaining shares are held by the Bosch family and by Robert Bosch GmbH.
